EDUCATION

Covenant University

Expected August 2027

Bachelor of Engineering in Computer Engineering

Ogun, Nigeria

Clubs: GDG Club, StartUp Lab, Chess Club, Literary and Debate Society

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Computer Architecture, Operating Systems, Algebra

PROJECTS

trackit | *React, TypeScript, Firebase, Git, Tailwind*

July 2025

- Developed a responsive habit tracking SPA featuring a custom Smart Coach algorithm for personalized user insights
- Engineered a type-safe architecture using TypeScript and Zod, optimizing app performance and ensuring real-time data sync via Cloud Firestore

Ticklo | *React, Vue, Twig/Php, TypeScript, LocalStorage, Git, Tailwind*

Oct 2025

- Built a ticket management system across 3 frameworks (React, Vue, Twig), demonstrating adaptability and framework-agnostic frontend skills
- Implemented secure authentication, CRUD operations, and robust form validation using Zod and React Hook Form to guarantee client-side input integrity

Cineo | *Next.js, TypeScript, Firebase, Tailwind, TMDB API*

March 2025

- Built a movie recommendation app with Next.js and TMDB API, enabling filtered discovery by genre, rating, year, and 40+ languages
- Designed a responsive React UI with Tailwind CSS and animations using Framer motion, streamlining personalized movie search for users

EXPERIENCE

Squaay

March 2026 – Present

Mobile & Frontend Engineer

Lagos, Nigeria

- Designed and built a custom Swift/Kotlin Expo Native Module to bridge a third-party payment SDK, improving mobile checkout performance
- Engineered a native in-app account deletion flow with custom bottom sheets, customer support API integrations, and secure token purging
- Refactored core data-fetching domains using React Query and Zod, establishing runtime contract validation

Squaay

July 2025 – Oct 2025

Software Engineer Intern

Lagos, Nigeria

- Served as the primary React Native mobile engineer at a social food startup, collaborating with a backend engineer and designer
- Implemented authentication and user onboarding flows for both customers and vendors
- Developed reusable and scalable UI components, improving development speed by 30%

SoSo Care

July 2024 – Oct 2024

Software Engineer Intern

Lagos, Nigeria

- Built a functional travel insurance page pushed to production, resulting in a 15% increase in revenue
- Diagnosed and resolved issues across 5+ pages, improving site performance by 90%
- Overcame the challenge of working on an existing codebase by quickly adapting to the code structure and implementing clean, efficient solutions

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, HTML/CSS, Bash

Frameworks: React, React Native, Next.js, Expo, Tailwind

Tools: Git, Linear, Firebase, Postman, DataGrip, Slack, Neon, Prisma, Drizzle, Clerk

Concepts: Software Engineering, Frontend, Agile Methodologies, UI/UX Principles, Code Quality & Best Practices, Performance Optimization, AI
